

Woodland Wildflowers

SOUTH-YORKSHIRE
forest
A National community forest Partner

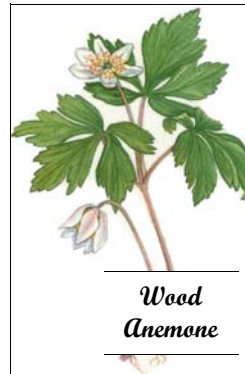

Name. _____

These are some of the flowers that you may find flowering in your local woodland at different times of the year.

Some of them, such as wood anemone, wood sorrel and yellow archangel are very special because they rarely grow outside ancient woodlands.

Use this collection to help you to identify the flowers in your wood. Tick the ones you find. Do You think that your wood may be an area of ancient woodland?

Carefully cut out each one and stick it in the correct place on the 'season circle' according to the time that it flowers. What do you notice?

*Wood
Anemone*

Yellow Archangel

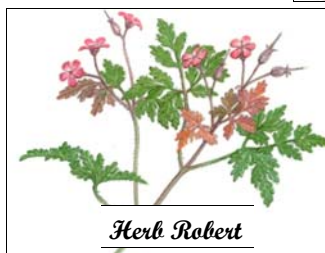

Wood Sorrel

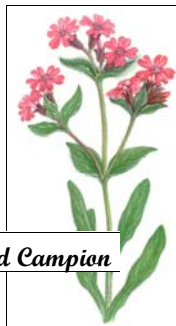

Dog's Mercury

Celandine

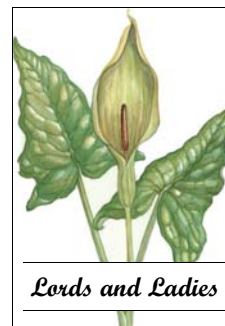

Herb Robert

Red Campion
